ABDUL HAKIM SHAON

Selangor, Malaysia | +60 11-5169 2338 | abdulhakimshaon7@gmail.com
linkedin.com/in/abdul-hakim-shaon-185817357
Available from November 2026 | 3- or 6-month internship

Solution Architect Intern | Ant International

Computer Science (Data Science) undergraduate with project experience in API integration, relational database design and technical communication. Interested in payment-system integration and translating business requirements into clear technical solutions.

EDUCATION

Bachelor of Computer Science (Data Science)

Monash University Malaysia | Year 2, Semester 2 (2026) | Expected graduation: 2027

TECHNICAL & RELEVANT SKILLS

Programming & databases: JavaScript/Node.js, Python, SQL; Oracle SQL, Firestore, relational modeling, normalization

Integration: Firebase Cloud Functions, Twilio webhooks, Gemini API, structured JSON processing

Communication & tools: Technical documentation, data storytelling, Git, Tableau, Vega-Lite

SELECTED PROJECTS

LaporKita AI | Backend & API Integration

github.com/abdulhakimshaon7-hash/LaporKita-AI

- Built a Node.js/Firebase backend for a team-developed civic reporting prototype, connecting a Twilio WhatsApp webhook, Gemini API and Firestore.
- Processed incoming complaints into stored reports and structured AI analysis; implemented retry handling, fallback results, related-report grouping and alert workflows.
- Worked across backend and Flutter dashboard integration in a two-person hackathon team.

Clear Away | Oracle Relational Database Design

- Translated a waste-collection case study into conceptual and logical data models and documented normalization from unnormalized data to third normal form.
- Produced an Oracle SQL schema with 14 tables and 16 foreign-key relationships, including primary-key, uniqueness and domain constraints.

Malaysia Palm Oil & Forest-Loss Data Story | Academic Project

asha0310-star.github.io/35174714_DV2/

- Built a single-page website with 15 Vega-Lite visualizations, including two geographic maps, exploring production, land use, tree-cover loss and trade.
- Used Python/pandas to reshape, aggregate and combine Our World in Data, Malaysian Palm Oil Board and Global Forest Watch data into chart-ready CSV files.
- Created indexed trends and state comparisons with annotations, tooltips and documented source limitations; published the project through GitHub Pages.

CERTIFICATIONS & ACTIVITIES

Prompt Design in Vertex AI - Google Cloud | Fundamentals of Deep Learning - NVIDIA

KitaHack 2026 participant, Team SoulNet | Google Developer Groups on Campus, Monash University Malaysia
